- Helped organized 4+ field trips per year, enhancing educational experiences for 50+ children while maintaining a 100% safety record.

PROJECTS

Blackjack Game in JavaFX

- Developed a Blackjack game in JavaFX with dynamic UI elements, animations, and transitions to enhance user experience.
- Utilized responsive UI layouts without external CSS, ensuring the design adapts to various window sizes and user preferences.
- Utilized OOP principles such as encapsulation and inheritance for better structure and maintainability of game components.

Website for Band using HTML/CSS

- Created a engaging and user-friendly website that showcases band members, show dates, and multimedia content.

Creating databases using PHP/MYSQL

CAREER OBJECTIVE

I am a computer programming student at St. Clair College, looking to jump into the field and get my career started as an entry level programmer. Throughout my time at school, I have gathered hands-on experience with many different programming languages including Java, JavaScript, PHP, and HTML/CSS. I have had the chance to contribute to several projects, both individually and in groups. My ability to learn new technologies quickly and be open to trying different ideas makes me confident that I will be an effective programmer for your company.

EDUCATION
